# Creating Programs in DataDirector

A program allows a user to quickly view DataDirector through the lens of a predetermined cohort of students. By creating a program, users can track students such as athletes, members of an honor society, participants in remedial help, or for a number of other reasons.

Create a Program

1. Access the Program section of DataDirector.

2. Select Create a New Program

3. Enter the Program information and click Save Changes.

Add Students to Your Program

1. On the Program Details screen, click "add students".

Students:	There are currently 0 students involved in this program	add students
Teachers:	There are currently 0 teachers involved in this program	add teachers
Linked Assessments:	There are currently no assessments linked to this program.	

2. Search for students and click Submit. Once your results have returned, select the students from the box on the left. Click Add to add the students to your program. When finished, click Continue.

Viewing Students in Your Program

1. Navigate to the Students section of DataDirector. Scroll to the bottom of the screen and choose the option that fits your program search. Click Go.

2. Your search will return students based on your previous selection. To view a demographic or assessment with these students, click the Assessments link to the left. You will be taken to a screen where you will need to select the assessment you would like to view.
